NOTE	 All parameters not specially mentioned are measured at 220Vac input, rared load and 25°C of ambient temperature. Refer to "STATIC CHARACTERISTICS". Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pare-wire terminated with 0.1 uF & 47uF parallel capacitor. Tolerance: includes set up tolrance, line regulation and load regulation. Line regulation is measured from low line to high line at rated load. Load regulation is measured from low 0% to 100% rated load.
